

Sign up & Reminder Setup

There's no way to "snooze" or "remind me later" for these reminders.

Reminder setup for hydration is messy and crowded.

How did the 2.3 litres recommendation calculated?

Setting up 'getting up' and 'sleeping' times may be more reasonable.

I'm confused with the 'activity' question when set up my hydration goal.

I'm not sure how often I should drink water in an hour.

Navigation

Reminder setup is hard to find after the onboarding process. I change my schedule very often, so I want a quick access button to the reminder settings.

I don't understand what the 'plus' button mean before clicking on it.

It is hard to find my order history.

The 'quick order' button is not obvious enough. How about putting it into the navigation bar?

After lunch, I want the 'quick order' button floating on the right side of the dinner reminder section.

Homepage

The font size on the homepage is quite small and it is hard to notice the reminder.

There is a time count down for the next hydrate reminder. Where is the time count down for the next meal reminder?

Does the remaining volume in the water glass mean the volume you are going to drink to achieve today's goal?

Meal Tracker

What does the 'check-circle' mean? Can I click on it?

I don't want to take photos of my meals. And I'm not able to log meals by text.

I prefer to choose which meals I am taking before logging foods.

I prefer to log my meals and water intake from separate tracking pages, rather than through the 'plus' button.

Can I quickly log the food from delivery without taking photos myself?

Hydration Tracker

I often drink coffee for hydration. How do I log my coffee intake?

How do I log my water intake with different volumes other than 50, 100, 150, and 200?

I'm confused with the mL. I don't know the capacity of my cup.

How do I undo my action if I misclick on adding water intake?

Does the 'water drop plus' button mean adding more water to today's hydration goal?

It's not quick and easy enough to log water intake through the 'plus' button. I prefer to use the 'water-drop plus' button instead.

Order & Checkout

How do I know I'm paying with my saved credit card?

What does the time mean on the right of each restaurant? Is the time calculated according to your current location?

What should I do after placing my order? Should I click on the 'close' button?

Tracking Delivery

How can I track my order if I order more than one delivery at the same time?

I prefer to not hide the map even when the order has completed.

Profile & Weekly Report

I prefer some charts and diagrams in the weekly report.

In the weekly report, I want to compare my performance from week to week.

I prefer the sub-section of the profile on separate pages.

Others

I merely use my phone while working. How do I get notifications then?

I want to log my fitness and calorie burned as well to balance with my daily calorie intake.
